

Welcome to Evidence for Learning (EFL)

Evidence for Learning has transformed how hundreds of SEND schools, colleges and provisions are able to evidence, assess, review and plan for meeting the unique needs of their SEND learners, especially in light of the Rochford Review.

It supports an Inquiry-based approach to education and provision, that allows all stakeholders involved in a young person or adult's learning and development, to quickly and easily gather photo and video evidence, linked to the individual's learning goals as well as any key skills frameworks.

Observations can be annotated and tagged to reflect any assessment framework and any assessment model. This includes evidencing and tracking progress against individual learning intentions and targets related to Education Health & Care (EHC) Plans. What's more, teachers can easily amend and add to these goals over time in order to respond to a learners' ongoing needs and development.

All evidence gathered is automatically organised by the app and readily available on-demand to anyone in the school. Stakeholders can search for and sort evidence by any attribute, and schools use these features to save time and workload and crucially to be better informed during planning, moderation and ongoing professional development. The same tools support real time deep dives into any aspect(s) and area(s) of your school's curriculum – allowing you to see how individual learners are experiencing your curriculum and how teaching is being personalised to support that learner's needs. Evidence for Learning gives you a platform and the tools to develop and demonstrate connected practice which links curriculum, pedagogy and assessment.

EfL has also transformed how parents/carers, external stakeholders and the learner themselves are engaged and involved in the entire learning process and journey – a multi-agency approach. Not only can photos, videos and notes be easily and securely shared by the school, but parents/carers can capture and submit their own photos, videos and notes to reflect the learner's development and experiences at home and outside in the community. Invaluable collaboration and powerful at showing where learning and knowledge is beginning to be generalised.

Evidence for Learning is perfect for supporting the new Engagement Model as defined and in the recently published guidance from the Department for Education (2020). The app has been used for many years by schools around the world to support engagement-oriented approaches.

Evidence for Learning can help you to:

- Demonstrate impact and show clearly what learners can do as a result of your curriculum, pedagogy and support
- Assess against ANY curriculum framework including your own custom-built frameworks
- Evidence, assess and track progress against individual targets related to EHC Plans using your school's own assessment model and schemes
- Automatically link evidence, achievements, outcomes and judgements
- Tools for working with and assessing the 5 areas of engagement in line with new DfE requirements and guidance.
- Report and analyse assessment and evidence data faster and more accurately
- Save time and be better informed in planning, assessment and reporting
- Better engage and involve parents in their child's learning and development
- Systemise assessment and moderation

Features include:

- Work with your own customised assessment criteria and sets of individualised targets. Individualised learning plans, EHCPs, progression frameworks and/or accreditation
- Frameworks can be easily and quickly edited and adapted over time as you need to make changes to reflect the needs of your learners
- Record small and subtle improvements: photo/video/audio, notes judgements all linked to targets
- Create Assessment Books using your own assessment schemes or commonly-used assessment models such as MAPP. Evaluate using the 5 areas of engagement (DfE, Jan 2020)
- Quickly and easily build a learner profile for each pupil containing all evidence, notes and assessments relevant to their learning and development
- Report and analyse assessment and evidence data – formative and summative assessment
- Generate rich learning journeys in an instant
- Share and engage with parents via our secure parent portal. Parents can submit evidence to help build individual profiles and evidence.
